PORTATRACK 8ft x 4ft Ground Protection panels from £89

PORTATRACK Panels are manufactured from 12mm thick recycled polyethylene. They will take up to 30 tons and are virtually indestructible. The Standard panel has an embossed surface suitable for all vehicle types. The Slip-resistant panel has grooves cut into the surface making it suitable for pedestrians as well as vehicles.

PORTATRACK Standard Panel	£ 98	10 pack price £ 89
PORTATRACK Slip-resistant Panel	£145	10 pack price £130

The panels weigh 33 Kgs and can easily be handled by two men. No special tools or equipment are needed.

The panels can be laid Side by side to form a 2.44 m wide road, or end to end to form two trackways

We have supplied products to hundreds of Mobile Home parks and many Local Councils.

PORTATRACK HEAVY DUTY panels are manufactured from Recycled High Density Polyethylene.

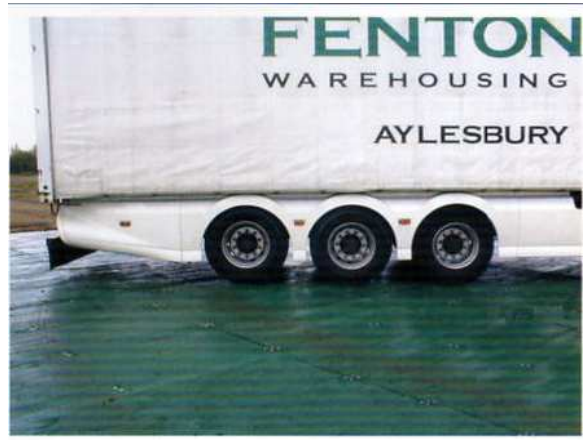

The panel size is 3m x 980mm x 24mm

Each panel weighs 45 kgs and can easily be handled by two men.

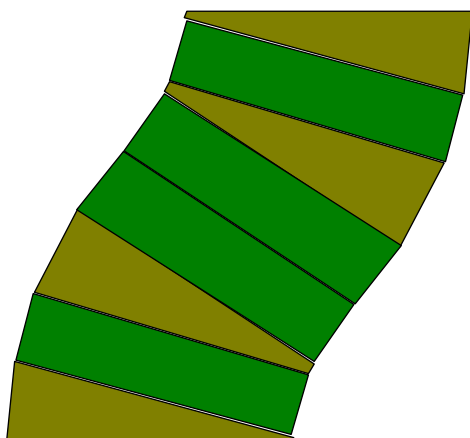

These panels will take up to 80 tons

No special equipment is required.

The strength of the **PORTATRACK** system is demonstrated by this articulated lorry loaded with 28 tons and turning within it's own length. The two outside wheels are dragging sideways in opposite directions. The ultimate test for plastic Roadway!

This JCB is raised off the ground, supported by the bucket teeth. The **PORTATRACK** remains undamaged!

Where the road is also used by pedestrians the leading edge is machined with a 30 degree chamfer for safety

15 degree turning panels are available
To construct the road to suit customer Requirements.

Our engineering department will be pleased to quote for any special requirements that you have.

We work closely with our customers and are continually developing our products.
